GLUE PULLER SYSTEM

Glue Puller - a glue pulling system for working on small dents from the outside when the paintwork has not been damaged. Typical examples are dents from parking or hailstones. This equipment is an excellent complement to lever repair systems particularly when you have to work on box sections and difficult to reach parts.

Benefits:

- The glue is easy to apply and remove.
- No special primers or detergents are required.
- The glue is removed with just a small twist.
- Glue Puller can also be used on box sections and uprights.

Spare parts and accessories

- **IMM-91001** Blue thermoadhesive glue - 250 gr.
- **IMM-91002** Brown thermoadhesive glue - 250 gr.
- **IMM-91003** Large flat pulling tool
